DIRECTOR OF CENTRAL INTELLIGENCE
Committee on Imagery Requirements and Exploitation

SEP 8 1983

MEMORANDUM FOR: COMIREX Members and Consultants

SUBJECT: CAMS II Processing Segment Core Functions

25X1 1. As you are aware, the development of the CAMS II system is proceeding toward its mid-May 1984 IOC date. One of the most significant milestones toward achieving IOC is independent testing by the Government to ascertain that the system being provided does meet certain minimum requirements. For the P/S, the initial phase is the Core Functions Testing scheduled from 15 February to 15 March 1984. This test phase will be geared toward repetitive and stress testing of the functions and capabilities deemed most necessary to support the management of imagery collection tasking operations, accomplishments reporting, and ancillary support operations (e.g., terminal functions). [redacted]

25X1 2. The outcome of these tests will be the largest single factor considered in the decision of the Program Manager whether or not to initiate transition from CAMS I to CAMS II (P/S). COMIREX, as the customer for the system, has been requested to support the testing by providing personnel to execute the predefined test cases. The COMIREX Staff's Operations Division will participate in the testing but, due to other operational and system transition commitments, cannot fully meet the staffing requirements. Moreover, a wide and varied mix of operations knowledge will enhance the utility of the test. [redacted]

25X1 3. Accordingly, the COMIREX member agencies and consultant organizations are requested to propose candidates to participate in the tests. From this pool, a selection of OD and Community personnel, reflecting a mix of skills and functional knowledge, will be trained in advance on the new system (i.e., the "dry run" training course for transitioning users) and then participate, with a part time commitment, in the Core Functions test runnings 15 February to 15 March 1984. [redacted]

Attachment to

CAMS II (P/S) CORE FUNCTIONS TEST PERSONNEL REQUIREMENTS

1. Experience: Completion of the CAMS I Language and Functions Course and with CAMS I user experience.
2. Duties: Receive transition training for CAMS II P/S; participate in acceptance test orientation; and, during the period of testing, execute pre-defined test cases under the guidance of a test director.
3. Availability:
 - 3-13 Jan 84 - Training (full time): Dry Run of Introduction to CAMS II (P/S).
 - 1 Feb 84 (TBR) - One day orientation to acceptance testing.
 - 15 Feb-15 Mar 84 - Test Operations. Total of five days during this period (10 hours each day).
4. Details on locations, clearance certification, and points-of-contact will be provided separately.
